

Points:
1/1

The tighter your drone turns the more_____ you get.

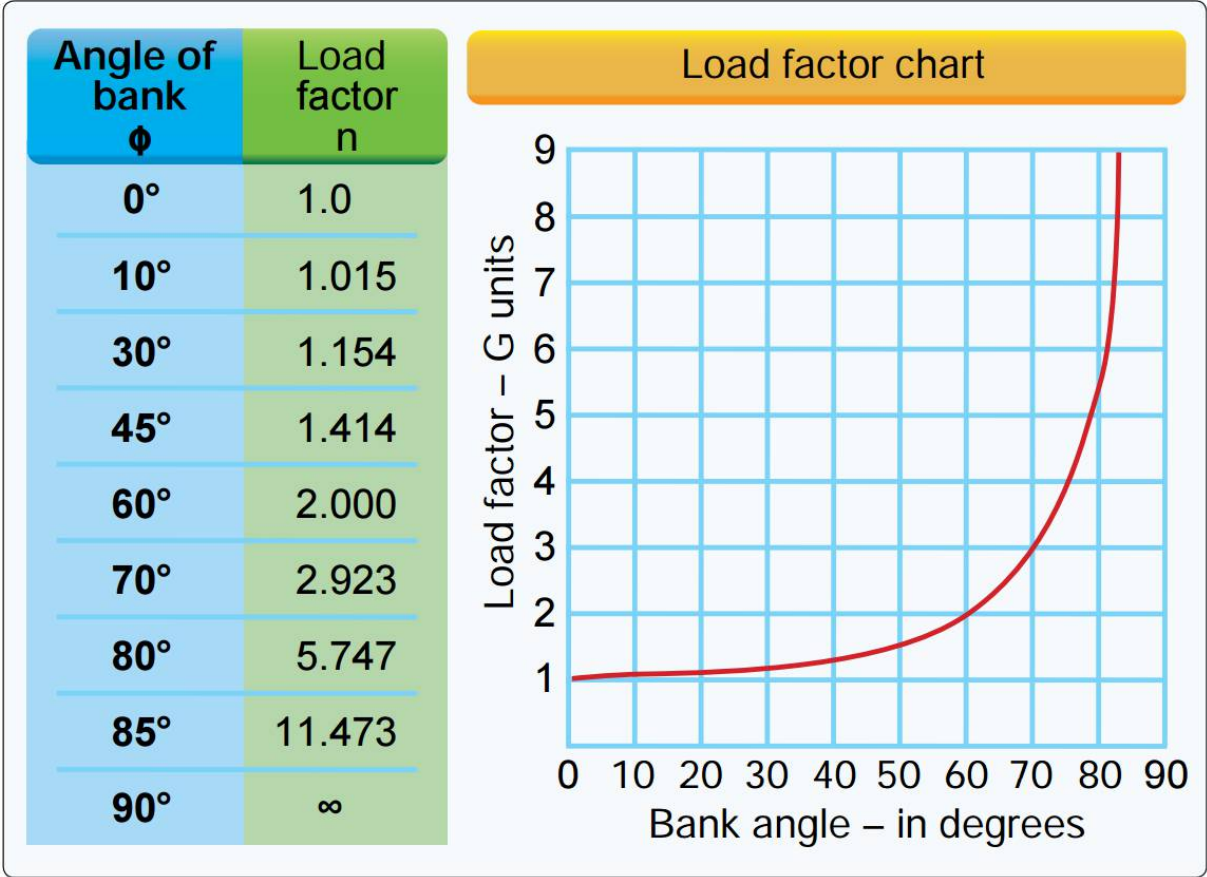

FIGURE 2.—Load Factor Chart.

- ☐ Control
- ☒ G Force ✓
- ☐ Speed

Points:
1/1

To get 3 G's, what degree is your drone turning? (See Figure 2)

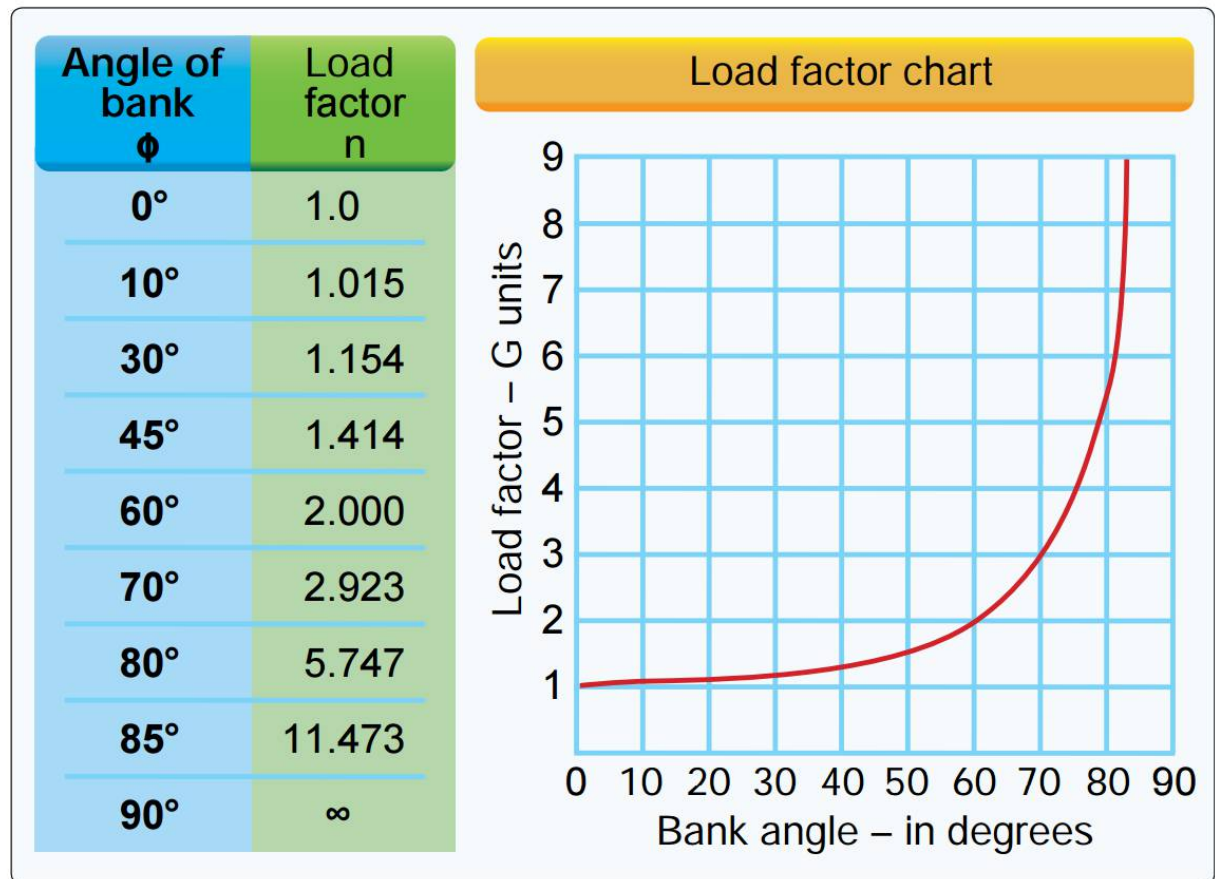

FIGURE 2.—Load Factor Chart.

☒ 70 degrees ✓

☐ 80 degrees

☐ 50 degrees

Points:
1/1

What is the center of gravity?

☐ The point where there is not gravity

☐ Practically anywhere

☒ The point where you could balance it on a pin ✓

Points:
0/1

What are the characteristics of the forward CG?

☐ Lower stall speed

☒ Slower cruise speed ✓

☐ Inherently more stable ✓

☒ Less stable ✗

☒ Higher stall speed ✓

Points:
0/1

What are the characteristics of the AFT CG?

☐ Less stable ✓

☐ Slower cruise speed

☒ Lower stall speed ✓

☐ Higher stall speed

☒ Faster cruise speed ✓

Points:
1/1

Having extra weight on your drone won't affect your drone (it's built for that).

- ☐ True
- ☒ **False** ✓

Points:
1/1

Where do you find information on how your drone performs under different weight and balance changes?

- ☐ From the guy you bought the drone from
- ☒ **Manufacturer Manual** ✓
- ☐ On the drone

Points:
1/1

What could be a consequence of operation of a small unmanned aircraft above its maximum allowable weight?

- ☐ Faster Speed
- ☒ **Shorter Endurance** ✓
- ☐ Increase maneuverability

Points:
1/1

What are the effects of having the center of gravity in the back of a plane?

- ☒ **More runway is needed to take off** ✓
- ☐ Trick question, no change is needed
- ☐ Less runway is needed to take off

Points:
0/1

What are the eight different situations that affect the performance of a drone?

- ☐ Time of day
- ☒ **Runway/launch area length** ✓
- ☒ **Low density altitude conditions** ✗
- ☐ Surrounding animals
- ☒ **Surface** ✓
- ☒ **High density altitude conditions.** ✓
- ☒ **High Humidity** ✓
- ☒ **High air temperatures** ✓
- ☒ **Presence of obstacles** ✓
- ☐ Surrounding obstacles
- ☒ **Slope** ✓
- ☐ **Surface wind** ✓

Points:
1/1

Why is it more difficult to control your drone in higher altitude?

- ☒ **Thin air** ✓
- ☐ Clouds
- ☐ Planes and birds

Points:
1/1

The air is great for the drone in hot location

- ☐ True
- ☒ **False** ✓

Points:
1/1

Wetter air causes great lift for the drone

- ☐ True
- ☒ **False** ✓

Points:
1/1

From what you see on Figure 2, what how many G's is your drone pulling at 60 degrees

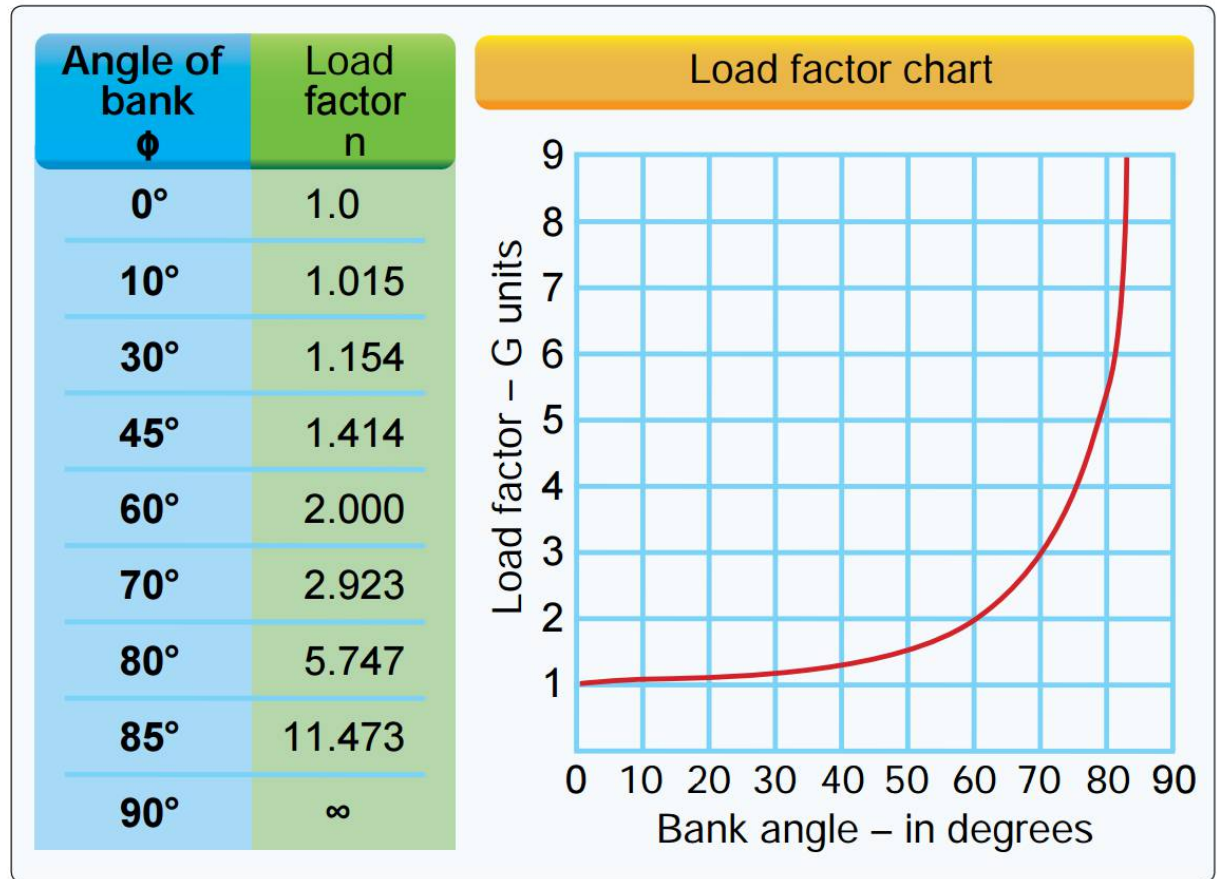

FIGURE 2.—Load Factor Chart.

- ☐ 3 G's
- ☒ 2 G's ✓
- ☐ 1 G's
